VoiceArrest™ Control Module — Models VA-30, VA-300

The VoiceArrest™ Control Module is a scalable, four-channel, “direct field,” low-voltage sound masking generator. The VoiceArrest™ Control Module is used in conjunction with the VoiceArrest™ Emitters to provide a complete speech privacy system solution.

**Features**

**Wireless Remote control**

The VoiceArrest™ Control Module is operated via a wireless, infrared remote control with four preset volume control buttons and an on/off button.

**Expandable**

The VoiceArrest™ Control Module VA-30 is expandable up to 30 emitters. The VA-300 is expandable up to 300 emitters.

**Dual Output Ranges**

The VoiceArrest™ Control Module can be configured for one of two output ranges via an internal switch. The lower setting produces an output level of 36 dB – 45 dBA, the higher range 48 dB – 57 dBA.

**Zoning**

Areas requiring different levels of speech privacy (i.e., enclose offices vs. open areas) can be zoned using individual control modules for those areas.

**Specifications**

**Control Module Dimensions / Weight**

- 7” x 8” x 2” / 5lbs.
